TRAJECTORY

— 1 memo filing · 1 lineage thread grouped from your brief fingerprints.

— Framing on file: pre-build / idea · market TBD · solo · traction: none · first-time founder.

— 6 assumptions still unresolved on the latest memos — workspace links them to experiments.

TASKS

AI REPLACING HUMANS

- Within 48h: interview 5 buyers or operators who already spend (time or budget) on a substitute for this failure mode: Vision without named first buyer and procurement path.. Log who signs spend, how often the pain fires, and one export or ticket that proves the workaround.
- Within 48h: interview 5 buyers or operators who already spend (time or budget) on a substitute for this failure mode: No incumbent substitute named — critique stays untestable.. Log who signs spend, how often the pain fires, and one export or ticket that proves the workaround.
- Close this validation gap — Proof that users switch from current behavior — with one tangible artifact only (screenshots of a procurement thread, spreadsheet export timestamped over a week, or a signed informal PO). Avoid survey summaries as evidence.
